ABSTRACT

The systematic development of horticulture curriculum for Indiana was the focus of this research project which validated a job task list for use in instructional material development. The job title catalog, A Landscape Gardener, was selected from those currently available through the Vocational-Technical Consortium of States (V-TECS) program. A purposive study as outlined in the V-TECS technical reference handbook was undertaken to validate this job title catalog for Indiana. Survey instruments were sent to job incumbent personnel in horticulture businesses and data from twenty returned surveys was tabulated and analyzed. From the selected list of 165, job incumbents selected 109 as those most commonly performed, also indicating tools commonly used and amount of time spent at various tasks. Finally the validated list of tasks contained in the job title Catalog were sequenced to facilitate further work in instructional materials development. (Survey instruments and survey data are included in the appendixes.) (JH)

Reproductions supplied by EDRS are the best that can be made from the original document.

Job Title Analysis for Selected Job Titles in Horticulture

STATEMENT OF OBJECTIVES

The objectives of this project are as follows:

- A. Select one job title catalog from those that currently exist in vocational horticulture that is available through the V-TECs program.
- B. Validate the tasks contained in the job title using a purposive study as outlined in the V-TECs technical reference handbook.
- C. Survey job incumbent personnel in horticulture as a secondary validation of the job title catalog.
- D. Sequence the tasks that are validated thto a systematic arrangement to facilitate further work in instructional materials development.

STATEMENT OF THE PROBLEM

Development of curriculum in vocational agriculture has lacked a systematic approach in Indiana. Current emphasis in V-TECs has motivated curriculum developers in vocational agriculture to begin the task of systematic curriculum development. The purpose of this research project is to begin systematic curriculum development in horticulture. A single job title catalog was selected from those currently available through the V-TECs system. A purposive study was undertaken to validate this job title catalog for Indiana. Finally, the validated list of tasks contained in the job title catalog were sequenced to allow for the systematic development of instructional materials.

PRIORITY AREA

The project was designed for RFP priority area #1, "Job Title Analysis Curriculum Development". The purpose was the revision of an existing curriculum and/or materials, or original development of a curriculum and/or materials related to a specific job title. Clearly,

the project proposed herein is within the description of this RFP.

PROCEDURES

General Design of the Study

The study was conducted to meet the purpose of conducting the purposive study to validate the job title "A Landscape Gardener". The specific procedures are as follows:

- The working committee was selected by Agriculture Education Staff to include university level horticulture specialists, agricultural education staff members at Purdué University, State Department of Public Instruction, Division of Vocational Education-Agribusiness personnel, and teachers of vocational horticulture.
- The working committee purged the task list using the criteria listed in "Task Analysis for Performance Based Vocational Education".

 Other responsibilities included revising and approving the survey instrument that had been prepared by the research staff using the V-TECS Technical Reference Handbook format and to assist in preparation of a list of Job Incumbent Personnel who would receive the survey instrument.
- 3. Surveys were sent to job incumbent personnel selected from an earlier survey sent to horticulture businesses. (See instrument in Appendix A).
- 4. The survey data was tabulated and analyzed permitting a sequential arrangement of the tasks. The task arrangement will facilitate future instructional material development efforts to be utilized in writing instructional materials in a systematic and sequential order for use by vocational instructors.

ANALYSIS PROCEDURES

Determination of tools used, tasks performed and time spent on, each task was conducted by using the V-TECS Program Survey Data Analysis system. This system was used to summarize data from twenty surveys returned. Specifically subprogram frequencies calculated frequency counts, mean relative percent time spent and stanines.

FINDINGS

The original task list from the V-TECS catalog for Gardening Groundskeeping consisted of 215 tasks. The working committee purged the list and provided some additional tasks to total 165 to be included in the task inventory.

The task inventory has been assembled under the following duty groups:

- A. Organizing and Planning All tasks that refer to managerial responsibilities.
- B. Directing and Implementing The tasks that are related to supervision and record keeping are included in this duty category.
 - C. Inspecting and Evaluating Filing, work records, reports, and
 - evaluation are tasks that are included in this group.
 - D. Training To provide guidance and instruction for employees.
 - E. Maintaining Plants This group refers to all activities that the Landscape Gardener would be involved with in plant care.
 - Preparing and Improving the Soil The tasks used for seedbed préparations, soil nutrients considerations, and soil erosion control were listed in this category.
 - G. Constructing and Maintaining Facilities Tacks live working with structures that are included as the requirements of

the landscaping work were listed in this group.

- H. Operating Equipment All tasks that refer to machinery and other equipment operation are included in this duty group. -
- Maintaining Equipment All the equipment used in the landscaping business requires maintenance, therefore, the tasks related to maintenance were formed as one duty group.

The tasks as, listed in the duty groups were then assembled with a list of tools that are used on the job and placed in a survey instrument to be sent to job incumbents.

The job incumbents then selected 109 tasks as those most commonly performed on the job. They also indicated what tools are commonly used on the job. The incumbent workers provided information as to how much time was spent working at various tasks.

, The final task list information with stanine values has been provided in the appendix of this final report.

EVALUATION

The working committee provided formative and summative evaluation of tasks through the purging activities and the final review of the task list.

Formative evaluation was also provided by job incumbents by indicating in the survey instrument what tasks were currently being performed by the time spent performing the tasks, and the types of tools used. The findings of the evaluation are provided by a listing of the tasks in duty groups with stanine values provided for the tasks identified (See appendix to report).

CONCLUSIONS. AND RECOMMENDATIONS

The project provided a list of validated tasks used in the Landscaping industry in Indiana. The tasks will provide the guide ines for preparing learning experiences for students preparing for occupations in the Landscaping area.

It is recommended that the validated tasks be analyzed and broken down into smaller units of work (subtasks). The learning content can then be determined from the subtasks and limits of content be established. This procedure will allow for development of instructional learning materials for use in vocational horticulture programs.

BUDGET,

soon as it is available from the Purdue University Contracts office.

STOP!

READ THIS PAGE BEFORE GOING FURTHER

Have you completed the Background Information section? Make sure before you continue with this procedure.

Procedure A - Checking Tasks of Present Job

- As you read each task in the Duty-Task section, pages 1 through 11, place a check () beside each task that you perform in your present job. Put your checkmark in the column headed "Check - If Done in Present Job."
 - DO NOT COMPLETE THE RIGHT-HAND COLUMN AT THIS TIME. 2.
- If a task that you perform is not listed anywhere in the entire list, write it in the blank space at the end of each series of tasks.
- Do not confuse work you do yourself with work you supervise.
- 5. Remember, at this time you are to complete ONLY the column headed "Check If Done in Present Job" for pages 1 through 11. Now, turn to page 1 and BEGIN.

Procedure B — Rating Time Spent on Tasks on Present Job

- Have you checked each task that you perform in your present job? Make sure before you continue with this procedure,
 - Now you are to rate the relative amount of time you spend performing each task in your present job. Relative time spent means the total time you spend doing the task compared 2. with the time you spend on each of the other tasks of your present job.
 - Use a rating of "1" if you spend "very much below average" amount of time on a task. Use a rating of "2" for "below average" time; and so on, up to a rating of "7" if you spend "very much above average" amount of time on the task.
 - Remember, you are to rate tasks that you have already checked in the first column 4. of pages 1 through 11!
 - Place your rating, according to the 7-point scale, in the right-hand column, headed "Time 5. Spent Doing Task on Present Job."
 - When you have completed all your ratings in the right-hand column of pages 1 through 11, you will have completed this Job Inventory, and you may turn it in. 6.
 - Now turn to page 1 and BEGIN your rating for the right-hand column. 7.

PAGE 1 OF 12 PAGES

DIRECTIONS:

- 1. Check tasks you do in your present job.
- 2. Add any tasks you do in present job which are not listed.
- 3. In the "Time Spent Doing Task on Present Job" column, rate the checked tasks according to the time you spend performing each task in present job using the "Time Spent Scale" below.

Time Spent Scale

- 🕽 🗝 very much below average
- 2 below average 🔑
- 3 slightly below average
- 4 about average

- 5 slightly above average
- 6 above average
- 7 very much 'above average
